Engineering Your Materials Handling Solutions

ABOUT US

Beach Wagner Pty Ltd is a mechanical engineering consultancy who design all elements of mechanical systems. These include materials handling systems and the associated conveyors (belt, bucket elevators, chain, screw type), lifting devices (bins, chutes, transfers, cranes, crane lifted bins, spreader beams, product manipulators and grabs), mobile transport equipment and supporting structures. While our specialisation is mechanical engineering we have the extra training and experience to carry out structural engineering certifications and designs of various elements of our systems where required.

The **Beach Wagner Team** has over 40 years combined experience in a range of industry areas including: Building Products, Food Manufacturing, Pharmaceutical Mining, Infrastructure, Packing Manufacturers and Maintainers and also General Mechanical Engineering. This broad range of experience allows for innovative, client based solutions for your needs improved by the differing approaches and ideas used in these different industries. A selection of our completed projects is displayed on our website www.beachwagner.com.au.

Beach Wagner is a boutique consultancy, and as such offers the advantage of minimal 'red tape' and administrative hurdles throughout the process, saving you time and money. With **Beach Wagner** you are dealing with a principal consultant at all times and can rest assured that your project is receiving the finest technology and experience at our disposal.

As required by Queensland Law the **Beach Wagner Team** are Registered Professional Engineers of Queensland and also are members of Engineers Australia and Australian Steel Institute.

Beach Wagner operate under a Quality Management System that is currently registering on the Queensland government's prequalification system and is working towards international standard ISO 9001:2008.
